## About

I'm a passionate Fullstack Developer from Slovenia. As a self-employed developer, I have the freedom to take on diverse projects and tailor my work to the specific needs of my clients. With a strong focus on frontend development, I specialize in building dynamic and responsive applications using Vue.js and Nuxt.js. I started programming with Vue.js five years ago and have been working extensively with it every day for the past three years. I thrive on new challenges and am constantly seeking to expand my skillset by exploring and mastering new technologies. Whether it's crafting seamless user interfaces or optimizing backend processes, I'm always eager to contribute and grow as a developer.

## Skills

- Git workflow using GitHub, GitLab, Gitea, Bitbucket.
- Programming/scripting languages including Python, Java, C/C++ (basics), TypeScript, JavaScript (ECMAScript), and PHP (basics).
- Other languages including HTML, CSS/SCSS/Sass, and JSON.
- Familiarity with technologies/frameworks such as Vue/Nuxt, Flask, Node.js, FastAPI, WordPress.
- UI frameworks such as Vuetify, Quasar, Bootstrap, and Tailwind.
- Database management systems including PostgreSQL, MySQL, Oracle, MariaDB, and PL/SQL, as well as ORMs such as Peewee, SQLAlchemy and Prisma.
- Desktop application development using Electron.
- Basic knowledge of Android app development using Android Studio.
- Experience developing applications with OpenGL.
- Basic knowledge of Adobe programs such as Illustrator, Photoshop, and XD.
- Proficiency in Linux operating system (bash).
- Basic knowledge with devops (docker and kubernetes)

## Education
